Package	
AQUA DESIGNER <b>Basic</b>	AQUA DESIGNER Basic treats the two worksheets for the dimensioning of continuous flow systems DWA-A 226 and DWA-A 131 "Dimensioning of Single-Stage Activated Sludge Plants". Aeration, based on the DWA-M 229-1, and phosphate elimination according to DWA-A 202 are also included in the basic version. Languages: German and English
AQUA DESIGNER <b>PRO</b>	With the PRO version you furthermore design sequencing batch reactors (SBR systems) according to DWA-M 210 and membrane activated sludge systems according to DWA-M 227. Languages: German and English (PRO = professional)
AQUA DESIGNER EDU	For universities or colleges, there is a special price on request. (EDU = Education)
AQUA DESIGNER Language	The PRO version contains German and English as operating and output language. All other language modules can be selected. In the network version all languages are included. Manual and help function are available in German and English.
SBR, MBR	SBR = sequencing batch reactor MBR = membrane activated sludge system
Licenses	
Single-User License	For the PRO package, you can choose 1, 2 or a company license (for a maximum of 14 users). All single-user licenses must be activated separately. For the basic version, we only offer the single-user version.
NET Client-Server License	If you want to use AQUA DESIGNER on several PCs in the network, you need AQUA DESIGNER NET. This version can be installed on any number of PCs. The basic version contains one user license. For at least 10 simultaneous users, the company license (NET COM) is worthwhile. This includes any number of simultaneous users.
Company License oder Firmenlizenz	There are two variants: company = up to max. 14 single user license: afterwards price on request NET-Company = any number of licences in one network
<b>Time limited</b>	The running time of AQUA DESIGNER is limited for 30 or 365 days.
